

TECH HUB MERU

The Specific Aim Of Joining AFRIKA KOMMT

1

Knowledge Transfer

- Learn scalable solutions that could benefit my Tech Hub Meru initiative
- Gain insights into German technical education and training systems that could be adapted for rural Kenya
- Acquire project management skills from leading German companies to implement community development programs

2

Professional Development

- Build on my technical writing experience from Knight Company to develop international documentation standards
- Transform my local IT support and teaching experience into global best practices
- Establish connections with German technology firms that could support digital literacy initiatives in Meru

TECH HUB MERU

By DANCAN MBAABU

SKILLS EXPECTED TO LEARN DURING THE PROGRAM

I expect to gain the following skills during the AFRIKA KOMMT programme:

Technical Skills

- Advanced data analytics methodologies beyond my current experience with Python, R, and SPSS.
- Enterprise-level business intelligence tools to complement my Power BI expertise.
- German industrial standards for technical documentation, building on my experience at Knight Company.
- International project management practices for large-scale data initiatives.

Development & Innovation Skills

- Social enterprise development to enhance my Tech Hub Meru concept.
- Sustainable business modeling for educational technology initiatives.
- Impact measurement frameworks for community development projects.
- Innovation methodologies from German industry leaders.

Profile 1

SAP S E – Cloud development with Focus on Analytics and data Science (SAP_5)

By DANCAN MBAABU

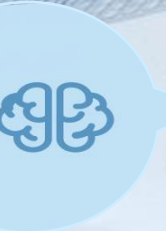

1 My Bachelor's in Mathematics and Computer Science directly aligns with SAP SE's Cloud Developer role requirements. Proficient in Python, R, and SQL, I possess advanced programming skills, complemented by dashboard development experience using PowerBI and Superset

2 My strong analytical foundation, honed through statistical analysis and data processing at KRA and Angaza Computecs, enables me to deliver actionable insights. Experience in end-to-end data analysis projects, system maintenance at National Treasury, and technical writing further strengthens my qualifications.

Profile 2 **SAP 06 – User Feedback Analysis with LLMs**

By DANCAN MBAABU

1 My Bachelor's in Mathematics and Computer Science directly aligns with SAP SE's User Feedback Analysis with LLMs role. I possess strong Python skills for data analysis, honed at KRA and Angaza Computecs, coupled with proven SQL proficiency.

2 My analytical abilities, including statistical analysis and insight extraction, are well-developed. Technical writing experience at Knight Company and stakeholder collaboration at KRA demonstrate effective communication.
